I am Good at

Creating digital products, including writing clean code and design. Teaching agile practices to teams and coaching members. Creating MVP. Learning.

I built products using

Ruby, Ruby on Rails, Perl, Mojo, PHP, Laravel, Blockchain technologies, TDD, Containers, CI, CD.

I Love to

Create software products. Working in teams. Share knowledge. Learn new things. Running. Tai chi.

Work history

Binary.com

Software back-end developer, Since August 2018 - present

Working on option trading system and cryptocurrency exchange system. Using Perl and postgres.

Sana Gostar (Achare and Ubar)

Agile Coach, Part time, Since January 2018 - present

Analyze and suggest solutions to solve organizational issues especially with Agile/Scrum methodologies. Working directly with CEO and product teams.

RoomHub.com

Technical Founder, January 2018 - September 2018

Roomhub is a bridge between Online Travel Agencies and Hotels, a Property Management System (PMS). Ruby / Ruby on Rails / Docker / Sidekiq / Postgres.

Parvazhub.com

Founder, Since April 2017 - present

ParvazHub is the first Iranian flight metasearch (like Skyscanner). I am responsible for everything here, from the idea to implementation. The engine uses APIs and web crawlers in many formats to crawl OTAs or even airport sites. Using Ruby / Ruby on Rails / Docker / Sidekiq / Postgres.

Zoraq.com

Software engineering manager, April 2015, March 2017

Build and supervise agile teams. Monitor product roadmap. Help developers to find and implement agile best practices. Introduce and setup advanced tools and concepts like Elastic ecosystem / docker / CI and CD. Monitor and manage to form multi-functional teams.

Zoraq.com

Software developer, September 2011, March 2015

I had two separate responsibilities:

1. Hire, manage and train new members to form various teams.
2. Design and develop systems for online booking and office needs.

Zoraq.com

Software developer, January 2011, August 2011

ZORAQ was one of the biggest OTAs (online travel agencies) in Iran. I learn many valuable startup concepts here. The platform was developed with PHP/MySQL and Bitrix CMS.

Safa Rayaneh

Software developer, February 2010, January 2011

Working on the banking system as a C#, XAML developer

Freelance

January 2003, February 2008

Design and create many websites with PHP and Wordpress. I learned how to deal with users and customers.
